

MIGUEL GALINDO

miguelgalindo1214@gmail.com | (347) 937-4065 | www.linkedin.com/in/miguelgg

A dedicated and detail-oriented software developer skilled in JavaScript, Java, PHP, Docker, and SQL. My core values center around continuous learning and adaptability, driving my passion for innovation in the ever-evolving technology field. I excel in meticulous code reviews and testing, aiming to contribute effectively to organizational goals and propel projects toward success.

EDUCATION

College of Staten Island, Staten Island, NY

B.S., Computer Science

Skills

- **Languages & Frameworks:** Java, JavaScript, PHP, HTML, CSS, React, Redux, GraphQL, Magento, MySQL, SQL, MongoDB, Docker, Composer, Git, GitHub, GitLab, Linux
- **Practices:** Object-oriented programming, Backend development, Code reviews, Unit Testing, Debugging, Bug fixes, Feature enhancements, Deployment processes, DRY Principles, Troubleshooting, Performance optimization
- **Interests:** Mobile App Development, Video Game Development, Artificial Intelligence (Machine Learning)

HTD TALENT

June 2024 – Present

Java Apprentice

- Engaged in intensive training focusing on advanced Java topics, including object-oriented principles, data structures, algorithms, and Java-based web development.
- Completed hands-on projects and coding challenges, demonstrating proficiency in the practical application of Java concepts.
- Collaborated with peers and mentors to solve complex programming problems and enhance understanding of best practices in Java development.
- Dedicated 40-60 hours per week to mastering Java, showcasing commitment and discipline in pursuing advanced technical skills.

RIGHTPOINT, New York, NY

Feb 2022 – March 2023

Software Developer/Associate Backend Developer

- Successfully developed PHP backend solutions for 10+ high-volume web-based PHP applications, leveraging technologies such as Docker, Composer, MySQL, and Magento
- Implemented new custom themes and Magento extensions
- Collaborated closely with cross-functional teams to conduct thorough code reviews, extensive testing, and meticulous debugging, resulting in code of superior quality, efficiency, and reusability
- Consistently achieved high productivity levels, completing 100% of daily tasks, including bug fixes and feature enhancements
- Leveraged Docker and Composer to optimize the development and deployment processes for clients, ensuring seamless consistency and portability across various environments
- Led comprehensive Magento version upgrade initiatives for a diverse client base, successfully managing and executing the seamless transition to new Magento versions
- Utilized version control systems (e.g., Git CLI) for code management, collaboration, and deployment processes
- Monitored Magento's logging capabilities, including System, Exception, Debug, and Security logs, to troubleshoot and diagnose issues, ensuring optimal performance and security of the Magento application

Certificates

Zero To Mastery Academy

March 2024 - April 2024

- Completed comprehensive online course by Zero to Mastery covering advanced topics in React development, including Redux state management, React Hooks, and GraphQL API integration

AlgoExpert FrontendExpert Certificate

January 2024 - March 2024

- Earned certification from AlgoExpert for completing the FrontendExpert course. Acquired advanced skills in frontend development, including JavaScript, React, HTML, CSS, and responsive design principles. Developed proficiency in building interactive and responsive web applications through hands-on projects and coding challenges.
